

STEINWAY L Y N G D O R F

Steinway & Sons

LS STUDIO

The LS series is the number one choice for larger rooms and spaces with rows of elevated seats. The series features an innovative line source approach incorporating floor-to-ceiling stackable speakers and boundary woofers. This allows sound to propagate over long distances, thus ensuring tonal consistency by reducing echoes, especially in large rooms. Line source technology means that every seat in the listening space has the same volume level and offers the same sound experience, from the front to the rear of the room.

FLOOR-STANDING SPEAKERS

The in-room LS speakers blend the dipole technology first introduced in the flagship Model D with the innovative line source technology from the LS. At over 8 and 6.5 feet tall, the open baffle LS speakers are for very large rooms where a sound system must sound - and look - impressive. The series consists of two full range floor-standing dipole speakers, the LS Concert and LS Studio, which emit sound from both front and back.

SPECIFICATIONS

Description:	Floor-standing dipole line source speaker
Frequency response:	120 – 22k Hz
Max SPL @ 1m:	131 dB
Amplification needed:	2 channels
Dimensions (H x W x D):	200.7 x 40.0 x 46.0 cm / 79.0 x 15.7 x 18.1 in
Weight:	58.4 kg / 128.8 lbs
Finish:	High-gloss black with matte gold or black accents
Item no.:	90013021x
Country of origin:	Denmark
