MODEL M center

The Model M series is anything you want it to be. For style-conscious audio enthusiasts who prefer a discreet, customizable installation, the Model M delivers. The system's slim and stylish architectural speakers can be mounted on or in walls and ceilings, partially or completely concealed, for a discreet installation of powerful speakers offering as high or low a profile as you desire. Whether a large home theater or an intimate living room, your environment reflects your design style. The Model M just makes it sound better.

STRONG METAL CABINET

The Model M's speaker cabinets are 100% aluminum, employing internal bracings and a thick front to hold the drive units in place. This dampens resonance and increases efficiency, and compared to wood cabinets, the Model M's structure minimizes gross volume.
